

Our Safety Charter

....building Jersey's future, safely!

We believe....

You and I should go home safely at the end of every day

Safety is everyone's responsibility – each of us has a role in creating a workplace without harm

To achieve this, we...

- Collectively all want a consistent industry wide approach to safety performance
- Stop any activity that feels unsafe
- Ensure everyone has the right to make a safety observation and hold a safety conversation
- Will visibly demonstrate commitment to Behavioural Safety Leadership every day by having honest conversations with our employees & supply chain
- Will implement Behavioural Safety Leadership across our businesses
- Will listen to, & act on, safety issues identified by workers
- Will learn from observations, near misses, incidents
- Will share information on our safety performance
- Expect our supply chain to demonstrate commitment to Behavioural Safety Leadership
- Expect tender submissions to include evaluation of a supplier's Behavioural Safety Leadership performance
