

Our Client Safety Charter

....building Jersey's future, safely!

We believe that....

We have a responsibility to help lead (construction) industry progression in safety

No matter what we build, safety is paramount

Our buildings should be safe by design, safe to build and safe to use

To achieve this, we...

- Will require Delivery Partners to demonstrate a commitment to Behavioural Safety Leadership
- Will challenge to ensure that Health and Safety is properly resourced in all our construction procurements
- Will have periodic site visits with partner senior management to understand and support them in resolving their safety issues
- Will require that our consultants and offsite partners demonstrate a commitment to Behavioural Safety Leadership including inductions before they visit site
- Will ensure good Health and Safety behaviour is recognised
- Support our Delivery Partners in putting safety first
- Expect our Delivery Partners to be open to all positive safety interventions
- Expect Delivery Partners to train their leaders and workers in Behavioural Safety Leadership
- Expect Delivery Partners to show evidence of continuous improvement in Safety and Behavioural Safety Leadership
